

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) A kitchen order system capable of transferring, to a kitchen, cooking item data representing a combination of a main cooking name selected from a main cooking menu and a sub-cooking name selected among a sub-cooking menu, wherein:
 - a data check table is provided for checking whether a combination of each of a plurality of main cooking names of the main cooking menu and each of a plurality of sub-cooking names of the sub-cooking menu is proper; and
 - when a sub-cooking name is inputted simultaneously with the input of the main cooking name, the input of the sub-cooking name is checked with reference to the data check table for executing, if the input is not proper, a notification that the inputted sub-cooking name is an input error.
2. (Original) A kitchen order system capable of transferring, to a kitchen, cooking item data representing a combination of a main cooking name selected from a main cooking menu and a sub-cooking name selected among a sub-cooking menu, wherein:
 - a data check table is provided for checking whether a combination of each of a plurality of main cooking names of the main cooking menu and each of a plurality of sub-cooking names of the sub-cooking menu is proper; and
 - when a main cooking name is inputted, a sub-cooking name properly corresponding to the inputted main cooking name is taken out from the data check table for selecting the sole taken-out sub-cooking name as the sub-cooking menu.
3. (Currently Amended) The kitchen order system according to claim 1 ~~one of claim 1 and 2~~, wherein the data of the main cooking menu and the sub-cooking menu are stored in a handy terminal for inputting a cooking item name to transfer cooking item data thereof to the kitchen.
4. (Currently Amended) The kitchen order system according to claim 1 ~~one of claims 1 and 2~~, the data of the main cooking menu and the sub-cooking menu are stored in an

external database and obtained from a handy terminal, which is provided for inputting a cooking item name, by communicating the external database for transferring cooking item data to the kitchen.

5. (Currently Amended) The kitchen order system according to claim 1 ~~one of claims 1 to 4~~, which further comprises an additional report forming part for statistically collecting the frequencies of transfer of the main cooking menu and the sub-cooking menu to the kitchen.

6. (Original) The kitchen order system according to claim 5, wherein the report forming part is provided in the handy terminal or in the external database.

7. (New) The kitchen order system according to claim 2, wherein the data of the main cooking menu and the sub-cooking menu are stored in a handy terminal for inputting a cooking item name to transfer cooking item data thereof to the kitchen.

8. (New) The kitchen order system according to claim 2, the data of the main cooking menu and the sub-cooking menu are stored in an external database and obtained from a handy terminal, which is provided for inputting a cooking item name, by communicating the external database for transferring cooking item data to the kitchen.

9. (New) The kitchen order system according to claim 2, which further comprises an additional report forming part for statistically collecting the frequencies of transfer of the main cooking menu and the sub-cooking menu to the kitchen.

10. (New) The kitchen order system according to claim 3, which further comprises an additional report forming part for statistically collecting the frequencies of transfer of the main cooking menu and the sub-cooking menu to the kitchen.

11. (New) The kitchen order system according to claim 4, which further comprises an additional report forming part for statistically collecting the frequencies of transfer of the main cooking menu and the sub-cooking menu to the kitchen.

12. (New) The kitchen order system according to claim 8, wherein the report forming part is provided in the handy terminal or in the external database.

13. (New) The kitchen order system according to claim 9, wherein the report forming part is provided in the handy terminal or in the external database.

14. (New) The kitchen order system according to claim 10, wherein the report forming part is provided in the handy terminal or in the external database.

15. (New) The kitchen order system according to claim 11, wherein the report forming part is provided in the handy terminal or in the external database.
